

# Technology changes lives

Let TechAbility show you how!

TechAbility is a new assistive technology and information technology (AT/IT) service which aims to improve outcomes for students with Special Educational Needs and Disabilities (SEND) in mainstream and specialist further education colleges.

# TechAbility provides a dynamic programme of support through a flexible, mobile team of specialist technologists and Assistive Technologists:

- Events and workshops to showcasing best practice
- Online and printed resources to support practitioners across the sector
- Assistive Technology solutions for students with SEND – from low cost fixes to hi-tech and innovative products
- AT and IT advice and guidance, from strategic to operational, supporting colleges and other providers and raising awareness at all levels of the organisation
- Bespoke solutions for your college – an individual service dependent on need.

## Benefits

### Use TechAbility to improve your SEND and High Needs provision:

- Supporting assessments
- Writing effective outcomes
- Planning programmes of study
- Helping students manage their work and record progress
- Data collection
- Communication and access tools for learners with high needs.
